The proposed desert energy plan is the most horrible idea I've ever seen for the California desert and must be rejected. No more large scale wind and solar farms and heat condensing energy plants should be located in our precious desert wilderness. No more bulldozing and erasing old growth desert habitat for the privatization of public lands. No more huge transmission corridors through our public lands. ROOFTOP SOLAR- got it? thank you for your time.
Response to Comment Letter F197

F197-1 Thank you for your comment. While it has not resulted in a change in the document, the BLM has taken it into consideration. The distributed generation alternative does not meet BLM’s purpose and need. Distributed generation was considered but not carried forward, as discussed in Volume II, Section II.8.2.1. BLM lands are largely devoid of buildings and distributed generation is applicable in locations with both electrical demand and areas or surfaces available for installation of distributed generation technology.
