Subject: wind energy in the desert

It is crazy to consider the DRECP at such an enormous cost both financially and environmentally when concentrating on rooftop solar would have no such effects. Please don't destroy our deserts with another huge project we don't need when there are better alternatives.

F48-1 Thank you for your comment. While it has not resulted in a change in the document, the Bureau of Land Management (BLM) has taken it into consideration. The distributed generation alternative does not meet BLM’s purpose and need. Distributed generation was considered but not carried forward, as discussed in Volume II, Section II.8.2.1.
