Subject: Please rethink this

- Rooftop solar technology has progressed significantly during the five years since the Plan was initiated. Given these advances, rooftop solar should be “brought forward for detailed analysis” on its technological and economic merits, rather than being dismissed because it is not utility-scale production in the desert.

Thank you.

F52-1  The distributed generation alternative does not meet the Bureau of Land Management’s (BLM’s) purpose and need. Distributed generation was considered but not carried forward, as discussed in Volume II, Section II.8.2.1. BLM lands are largely devoid of buildings and distributed generation is applicable in locations with both electrical demand and areas or surfaces available for installation of distributed generation technology.
